- Each registered client is allowed to have only one account. Clients are allowed to register only one account per family, address, email address, IP-address, credit or debit card, e-wallet or other method of making electronic payments. Persons otherwise connected with the client are prohibited from registering on the Site.
- In the event of:
- doubts arising regarding the identity of the client or the data provided by them (for example, address, credit or debit card details, other data);
- various fraudulent actions committed by you or any other person acting in your interests or in collusion with you, including but not limited to:
- a) chargeback or rake fraud;
- b) use of a stolen or unverified bank card as a source of funds;
- use of any dishonest methods of obtaining information or circumventing restrictions set by the company.
- The Company's management has the right, at its sole discretion, to request from the bet participant any documents confirming their identity or other data provided by them (for example, passport data, residential address), as well as to cancel any payments until the verification of the data is completed.
- If the Client refuses to undergo verification, the company reserves the right to declare their bets invalid (including bets made from duplicate accounts). The company's management also reserves the right to take any reasonable measures, including but not limited to blocking the account and available funds, until the owner of the account is established and the methods of funding the account used by them are confirmed.
- Based on the results of the investigation, the company may take any decision that it considers fair and reasonable, namely:
- The Client is responsible for keeping secret their password and account number received during registration. All bets registered by the bookmaker are considered valid. Cancellation of bets is governed by these Terms. If the Client's login or password comes into the possession of third parties, the bookmaker must be notified of this, and the Client must change the login and password for their account and the email password to more complex ones. Disclosing codes for withdrawing funds and changing the phone number to third parties is prohibited.
- If the account is blocked for security reasons, due to regulatory requirements, as a result of failed verification or due to suspicion of violating the Terms of Service, the Client may contact the Security Department to initiate the process of account recovery or withdrawal of funds.
- The Client may top up the account balance or withdraw funds in various ways. Information on the methods of topping up the account balance and withdrawing funds can be found in the "Payments" section.
- Withdrawal requests are processed around the clock.
- The Company's security service has the right to:
- reject withdrawal requests if the funds were deposited via electronic payment systems;
- refuse withdrawal of funds if the amounts of deposits or withdrawals do not correspond to the amounts of placed bets (the amount of the client's bets must correspond to the amount of all deposited funds, and the bets must be made at odds of at least 1.1; multiple bets with minimal impact on the balance are not taken into account, i.e. bets on opposite outcomes in games such as roulette, baccarat, craps and dice). The

amounts permitted for withdrawal are calculated based on the amount of bets made after any account top-up;

- refuse withdrawal of funds in the event of abuse of the gaming account. In this case, your account must be verified before you can withdraw funds.
- The Company's security service does not recommend that Clients:
- transfer funds between payment systems;
- deposit and withdraw funds without placing bets.
- Funds can be withdrawn only using the same details by which the account balance was topped up. If you use several methods of topping up the account, withdrawal must be made in proportion to the deposits.
- Under no circumstances does the Company accept cash deposits or bank checks. Any financial transactions must be carried out using approved electronic payment systems or bank transfers. The Company reserves the right, at its sole discretion, to refuse withdrawal of funds through certain payment channels and to require, as an alternative, withdrawal by bank transfer, as well as to restrict or suspend the Client's use of certain methods of topping up the account or withdrawing funds without prior notice. All payment instruments must be registered in the Client's name and may be subject to additional verification.
- ATTENTION! The company's administration does not recommend depositing and withdrawing funds using electronic wallets belonging to third parties.
- The company's security service reserves the right to treat such cases of account top-up as fraud and to block users' transactions without prior notice.
- The company's administration has the right to refuse withdrawal of funds using payment details that do not belong to the account owner.
- Under certain circumstances and in relation to certain Clients, the Company has the right to refuse reimbursement of service fees charged by payment systems when topping up the account balance or withdrawing funds, which the Company usually reimburses.
- The exchange rate indicated when performing various payment operations may differ from the current exchange rate displayed on our Site. When processing transactions (deposits and withdrawals), currencies are converted at the rate set on the Company's Site at the relevant moment.
- This rate is not fixed and may change several times a day or, conversely, not change for a long time, and the date and time of the actual debiting of funds depend on the currency exchange rate selected on the Site at the relevant moment. You can view the final debit amount and the exact exchange rate in the deposit and/or withdrawal request.
- Please note that the Company bears no responsibility to players for any indirect, incidental or unintentional losses related to the exchange rate and currency conversion.
- In special cases, the company has the right to unilaterally initiate the procedure for verifying the client's payments with a request for additional information from the payment system.
- According to the terms of some payment systems, the maximum verification period may reach 180 days.
- If the Client does not comply with the Company's rules (for example, violates the Terms of Service, does not place bets before requesting withdrawal of funds, etc.), the Company reserves the right to refuse such Client withdrawal of funds.
- Withdrawal policy. Processing of requests may take up to 7 (seven) business days, depending on the selected payment method.
- Requirements for providing documents for withdrawal of funds. During the processing of withdrawal requests, the Company reserves the right to request certain supporting documents from the Client in order

to comply with regulatory requirements and prevent fraudulent actions. Upon such a request, the Client is obliged to provide the Company with, among other things, the following documents:

- A document confirming the payment methods used;
- Other documents required in the provision of services.
- The Client must provide these documents within a period not exceeding one (1) month from the moment of the Company's request. Failure to provide documents within the specified period may lead to suspension of the withdrawal process, and the funds may be confiscated.
- To receive assistance on any issues or difficulties that may arise during the withdrawal process, the Client is recommended to contact our support service.
- When topping up the account balance on the Company's Site and withdrawing funds in BTC via a blockchain-based cryptocurrency payment system, a commission fee is charged.
- Only one Bonus is allowed per Client, family, address, shared computer, shared IP-address and any similar account data, including email address, bank account details, credit card details and payment system account. Any abuse of Bonuses will lead to the closure of the corresponding account.
- Top up your account.
- The first deposit bonus must be wagered by placing bets in the amount of the deposit.
- See the full text of the terms for granting the "First Deposit" bonus.
- BONUSES FOR ACCOUNT TOP-UP
- The bonus must be wagered by placing bets in the amount of the deposit.
- GIFTS
- A gift is a special type of Bonus, to receive which a deposit must be made (unless otherwise expressly stated in the rules). Gifts include free spins with or without a wagering requirement, as well as promo codes for free spins and bonus cash funds with or without a real-money wagering requirement.
- To use a gift, the Client is not obliged to make a deposit. However, it is often necessary to meet certain conditions in order to use the funds received as a gift.
- At any given moment in time, only one gift may be active. The remaining gifts must be inactive, suspended, or annulled.
- Promo codes and gifts received in the form of promo codes may be activated only in the Client's main wallet. Use of promo codes with other currency wallets will result in annulment of the offer and loss of wagering progress.
- All currently valid bonus offers, including deposit bonuses, welcome bonuses, account top-up offers, promo codes, gifts, and other temporary or periodic incentives (collectively referred to as "promotions"), as well as the rules, restrictions, and participation criteria applicable to them, are published and regularly updated on the Bonus Program page.
- Accepted currencies and wallets
- 1. Payments made in cryptocurrencies and blockchain networks listed on the Company's payment page are accepted for processing. Transactions from unsupported wallet accounts or in unsupported tokens may be rejected or lost. In such cases, the Company is not liable for losses.
- Rules for topping up a gaming account and withdrawing funds
- 2. Before being credited to the Client's account, all cryptocurrency deposits must be confirmed by the corresponding blockchain with a sufficient number of confirmations.
- 3. Cryptocurrency withdrawal is carried out only to confirmed wallets. Before withdrawing funds, the Company may require identity verification and proof of wallet ownership.

- 4. The Company reserves the right to convert cryptocurrency assets into fiat currency or stablecoins for operational or regulatory reasons, after notifying the Client thereof, if possible.
- Risk disclosure and regulatory compliance
- 5. You acknowledge the high volatility and irreversibility of cryptocurrency transactions. The Company is not liable for losses resulting from market fluctuations.
- 6. For the purpose of complying with applicable regulatory requirements, all cryptocurrency transactions are subject to standard anti-money laundering (AML) checks. In some cases, transactions that appear suspicious or exceed certain limits may require additional verification and be processed longer within the framework of standard regulatory procedures.

- Comparison of the scoring performance of halves, periods, quarters, innings — it is necessary to determine whether the scoring performance of the halves (periods, quarters, innings) will be the same or which half (period, quarter, inning) will be the most productive.
- "Draw in at least one of the halves".
- Example. The game ended with the score 2:1 (regular time).
- Comparison of teams — it is necessary to determine which of the proposed teams will score more goals or score a greater number of points.
- Official added time — it is necessary to determine whether more or fewer added minutes than the proposed value will be added to the regular time in each half.
- Comeback win (regular time including added time) — the team that was trailing in the score during the match but won the match is considered to have achieved a "comeback win". If the match ends in a draw, the bet "Comeback win — yes" is considered lost.
- Example: "Team 2 will score a penalty — no".
- The total number of minutes during which there was a draw is calculated: this is the first 15 min + 14 min (36 - 21)=29 min.
- Total leading time of the first team (21- 16) + (60-36)=4+24=28 min.

Examples ⊳ 1xBet company rules ⊳ exhvtetrdaaw.top

- Winning odds for bets on Milan's victory - 2.0.
- Then the winning odds for the outcomes included in the accumulator are multiplied: 2.0 x 2.1 x 2.9 = 12.18.
- With an accumulator bet of 100 rubles, the winnings amount will be 100 rubles x 12.18 = 1218 rubles.
- Net winnings (minus the stake amount): 1118 rubles.
- System 3/6 (3 winning options)
- System 3/6 is a bet on the full combination of accumulators of a certain size (3) from a pre-selected number of events (6). 3 or more events must coincide for the system not to lose.
- 1 event 1 1.6 win
- 2 event 2 1.9 loss
- 3 event 3 1.9 loss
- 4 event 4 1.3 win
- 5 event 5 1.45 win
- 6 event 6 1.85 win
- To calculate the winnings for the system, perform the following steps:
- 4. Winnings for each accumulator from the table above:
- 4. Final calculation of winnings for this system:
- Winnings are summed across all system options: I + II + III + IV = 9.05+11.54+10.45+12.88 = 43.92 rubles.
- With an "Asian handicap" bet, the bookmaker effectively accepts two bets. Thus, a bet with odds (+1,25) is a set of two bets: on handicap (+1) and on handicap (+1,5). The amount for each of these bets is equal to half the total handicap amount. The overall handicap winnings will be equal to the sum of the winnings of these two bets. Depending on the result, you may win both bets; win one and get a refund on the other; lose both.
- match score (0:1) – handicap (+0.5) - loss, handicap (+1) - refund.
- match score (1:1) – handicap (+0.5) - win, handicap (+1) - win.
- match score (0:2) – bet lost.
- match score (0:1) – handicap (-0.5) - win, handicap (-1) - refund.
- match score (1:1) – bet lost.
- match score (0:2) – bet won.
- For example, an accumulator of 100 rubles was placed from two events with total 3.25. Both pairs played with the score 3-0. How much will we get? Here there will actually be 4 accumulators: >3,>3; >3,>3.5; >3.5,>3; >3.5,>3.5, which means we get a refund of 25 rubles on one, all the others are lost.
- match score (0:0) or (0:1) – both totals went through, bet won (100x1.4=140 rubles)
- match score (1:1), (0:2) – bet on total (1.5)U – loss; bet on total (2)U – refund 50 rubles.
- match score (1:2) – bet lost.
- match score (0:0) or (0:1) – bet lost.
- match score (1:1), (0:2) – bet on total (1.5)O – win; bet on total (2)O – refund 50 rubles (50x1.4 +50=70+50=120 rubles)
- match score (1:2) – bet won (100x1.4=140 rubles)
- Volleyball. South Korea (women) - Myanmar (women) 1-th will win the 15-th point in the 1-th game 1.45
- Example 1. All events won.

- Myanmar won, the winnings will be 10x1,45=14,5 rubles;
- The 4-th bet will be calculated as: (24,3 – 10) + 10x1,45 = 14,3+14,5 =28,8 rubles. This will be the winnings on the bet.
- Example 2. The first, third and fourth events won.
- The 2-th bet – loss (14,5 – 10)=4,5 rubles – the remaining balance on the chain's account;
- The 4-th bet will be calculated as: 6,12 x 1,45 = 8,87 rubles. This will be the winnings on the bet.
- Example 3. The first, second and fourth events won.
- The 3-th bet – loss, will be calculated as: 20,7 – 10 = 10,7 rubles;
- The 4-th bet will be calculated as: (10,7 – 10) + 10x1,45 = 0,7+14,5 =15,2 rubles. This will be the winnings on the bet.

- First half-match - you need to determine the outcome of the first half and the final outcome of the match.
- Determine the score - you need to determine the score of the match (regular time).
- Match winner - advantage in goals scored (points, sets, etc.) in the final result of the match, i.e. taking into account extra time (overtime) and post-match penalties (shootouts) if any.
- First substitution - you need to determine which of the teams will make the first substitution. If a substitution in the match is made by both teams simultaneously (same time according to the match protocol), then bets are settled with odds «1».
- Time of first substitution - you need to determine in which of the halves or during the break the first substitution will be made in the match. If there are no substitutions in the match, the bet is settled with odds «1».
- Penalty yes/no - you need to determine whether or not a penalty will be awarded in the match.
- Handicap - a handicap in which a team's advantage or deficit is expressed only in whole numbers. It assumes three outcomes: W1, X, W2. To determine the outcome of bets with a handicap, the actual result of the match or competition is recalculated using the handicap number.
- What will happen earlier in the match. For example, "Yellow card / goal" - you need to determine what will happen earlier in the match: a yellow card will be shown or a goal will be scored. If there is no yellow card and no goal, bets are settled with odds «1».
- Double (hat-trick, poker) in the match - you need to determine whether or not exactly two goals (double), exactly three goals (hat-trick), exactly four goals (poker) will be scored by one athlete in the match. Own goals are not counted.
- Clean sheet - this is a match in which at least one of the teams did not concede a single goal.
- Bets "First/last goal from ()min to ()min". Bets on this outcome are accepted taking into account added time.
- Bet on leadership and on the duration of a draw. The bet is accepted for regular time (excluding added time). When settling bets, only full minutes are taken into account..
- The bet "Any goalkeeper touches the ball during the first N minutes of the match" and "Both goalkeepers touch the ball during the first N minutes of the match" take into account any touches of the ball by the goalkeepers, even if the ball was out of play at the moment of the touch, etc. These bets take into account actual touches of the ball by the goalkeepers, regardless of whether such a moment was shown in the TV broadcast or not. If the moment of touching the ball was not shown in the broadcast (for example, if a goal kick was not shown because a replay was being shown at that moment), then the time of the touch of the ball is taken as the time of resumption of the live broadcast.
- Bet "Leader after the scored number of points". In this bet, it is required to determine the position of the teams after a certain number of points played.
- Example. Bet "After 10 points W1".
- If the variant of the event outcome in bets of the type "Special", "Special bets" was not presented in the list of available bets, then bets on these outcomes remain in force and will be settled according to the results.
- Only one of the dependent outcomes can be included in an express. If two or more dependent events are included in one express (system), the events with the lowest odds are excluded from this express (system).
- Dependent outcomes (interdependent events) - the result of one part of the bet affects the result of the other part.

- Bet 100 RUB on Milan to win.
- event bet odds
- Bet amount: 60 RUB.
- 2. Calculation of the bet amount per one option: divide the bet amount (60 RUB) by the number of options for system 3/6 (20), we get 60:20=3 RUB. The bet amount per one option is 3 RUB.
- Bet amount - 100 rubles.
- That is, the bet +0,75 on Villarreal, the bet is split into: bets with handicaps (+1) and (+0,5).
- Bet on Real Madrid handicap (–0,75), then we get two bets with handicap (–0,5) and (–1).
- If a bet on an Asian handicap was part of an accumulator or system, then the number of options doubles.
- A bet on a total that is a multiple of 0.25 (but not a multiple of 0.5). Such a bet is calculated as two bets in the amount of half the sum, with the same odds, and with the nearest values of "regular totals" (integer, or multiples of 0.5).
- For example, a bet on total 1.75 under – 100 RUB with odds 1.4.
- During calculation, the bet is split into two: total (1.5)U and total (2)U. The bet amount is divided in half (50 RUB each)
- For example, a bet on total 1.75 over – 100 RUB with odds 1.4
- During calculation, the bet is split into two: total (1.5)O and total (2)O. The bet amount is divided in half (50 RUB each)
- The coupon consists of four events. Bet amount 10 rubles.
- Bets will be calculated in the sequence specified in the coupon.
- The 2st bet (Navy win) will be calculated as: (14,5 – 10) + 10x1.62 = 4,5+16,2=20,7 RUB;
- The 3th bet will be calculated as: (20,7 – 10) + 10x1.36 = 10,7+13,6 =24,3 RUB;
- The 3th bet will be calculated as: 4,5 x 1,36 = 6,12 RUB – the remainder on the chain's account;

OP-03. 1xBet — money route

I used account OP-03-A with GEO **Bangladesh**, a personal payment account of the same GEO and currency **BDT**. Game — **Tower Rush original, Galaxsys**, money configuration **TR-BDT-OP-03**, RTP **96,55%**, cap of one tower **115 000,00 BDT**. Environment: Slimbook EVO14 / Windows11 / Chrome142.0.7444.71. Registration — phone, confirmation — sms; no new document was requested at registration and deposit. On the first withdrawal no new document was requested; the wallet identity matched the account. This is not a cancellation of a future KYC. The initial cash/bonus/locked/pending were 0,00/0,00/0,00/0,00 BDT. I did not activate Welcome, bonus=0,00 BDT; the separate showcase offers remained in their cards.

Required before external withdrawal	Funds of the same owner	All bets settled; cash-T≥D; no active bonus/pending

I preserved the original admission of deposit turnover at a coefficient not below 1,1: all positive Cashout of this session≥×1,1, and lost accepted bets remained in the money turnover. Counter-bets for minimal balance change were not used.

I opened the cashier, selected bKash, checked the currency and created request **OP-03-D**. In 06.11.2026 09:10:00 UTC+06:00 I sent **2 240,00 BDT**. Casino deposit fee 0,00 BDT; external fee on top of the sending **0,00 BDT**, base — the sent 2 240,00 BDT; full debit at the payer **2 240,00 BDT**. No conversion,1 BDT=1 BDT. In 06.11.2026 09:12:36 UTC+06:00 cash received **2 240,00 BDT**, after which the balance became 2 240,00 BDT, bonus/locked/pending0,00 BDT. Crediting interval 156 s. I opened original Tower Rush, set the bet **280,00 BDT** and performed Build/Cashout manually; the confirmed results are given below.

I completed **12 paid towers and 12 accepted bets**. Turnover **T=3 360,00 BDT**, full payouts **G=2 730,00 BDT**, game **net=G−T=-630,00 BDT**, observed return **100×G/T=81,2500%**. Cash balance before the external request **1 610,00 BDT**. Deposit turnover fulfilled: 3 360,00≥2 240,00 BDT; bonus credit was not used. A payout less than the stake was counted as a net loss. Intermediate floors and the protected Frozen amount were not added as separate repeated credits.

I submitted **OP-03-W** via bKash in **06.11.2026 09:25:02 UTC+06:00** for **900,00 BDT**. This amount moved from available cash to reserve, and total cash did not increase before the request was settled. Verification ended **06.11.2026 09:35:13 UTC+06:00**, sending took place **06.11.2026 09:39:40 UTC+06:00**, external receipt — **06.11.2026 09:46:07 UTC+06:00**. Request confirmation: sms. **9,00 BDT** payment fee was withheld from the request; base — 900,00 BDT. Externally received **891,00 BDT**, rate 1:1, the fee was not deducted a second time from the casino. After settlement cash **710,00 BDT**, bonus/locked/pending **0,00/0,00/0,00 BDT**; this balance remained inside the casino.

Casino reconciliation:0+2 240,00−3 360,00+2 730,00−900,00=710,00 BDT. **Payer reconciliation:**expense 2 240,00 BDT, of which credit 2 240,00 and external fee 0,00. **Receipt reconciliation:**request 900,00−fee 9,00=891,00 BDT. **Overall result of own funds:**received 891,00+left in casino 710,00−payer expense 2 240,00=-639,00 BDT. I distinguished the game result -630,00 BDT and the total after fees -639,00 BDT. The withdrawal completed a specific route, but did not promise such a timeframe for any future request.
