4. Official demo, provider and locales

- Galaxsys publishes different entry pages Desktop Demo and Mobile Demo. In the saved capture, both led to Tower Rush configurations with `activeGameId=90`, `culture=en`, `isDemo=true`, `mode=2`, `gameKindName=TowerRush`, `gameTypeName=TowerRush`.
- In the outer frame, `partnerId=13` and `isMobile=true` were observed; in the nested game frame, `partnerId=2112` and `isMobile=false`. In both, `isFeatureMessagePackEnabled=true` and `isMessagePackEnabled=false` were observed. Sessions use `token`, `playerId` and `partnerPlayerId`. The official entry pages are separate from session launch. The editorial route uses a separate official launch page; a permanent session URL and the right to arbitrary embedding are not assigned.
- SlotCatalog describes HTML5/JS and support for Windows, Android and iOS, and its author separately reports a personal check of several browsers and a preference for Chrome. This is the author's test SlotCatalog. In this base, the game is launched as HTML5; APK/operator client and Safari are described separately from the game product.
- Galaxsys attributes to the game's features the original concept, dynamic animations, the bonus system and up to three types of bonus floors. In similar games, the cards show Atlantis, Plinkoman, Jungle Wheel, Golden RA.
- Galaxsys indicates the address **26 Amiryan street, Yerevan, Armenia** and the B2B contact **sales@galaxsys.co**. The sales form asks for name, email, company, phone, WhatsApp/Telegram and comment. The general form offers the topics Products and solutions, Careers, Other topics. For partners, 60+ games in one integration, 170+ currencies, 3 000+ brands, customization, branded versions, multilingual support, and support are stated. The availability of a specific currency and locale in an individual game depends on the integration.
- According to the legal footer of Galaxsys, **Digitain (MT) Limited**, registration number **C 87254**, is registered at the address **Tower Business Centre, 2nd Floor, Office 230, TRIQ IT-TORRI, Swatar Birkirkara, BKR 4013, Malta**. The Critical gaming supply licence MGA **MGA/B2B/592/2018** dated **29.01.2020** and the Gambling Commission account **63601** for the United Kingdom are indicated. These are data of the B2B provider, separate from casino licenses and the rules of the target market.
- On About Us, the executives are listed: Vardges Vardanyan (founder), Hayk Sargsyan (CEO), Teni Grigoryan (sales and partners), Artush Chibukhchyan (CTO), Vigen Safaryan (CPO), Mikael Pogosian (B2C Development), Mohammad Reza Saffari (Sales), Hasmik Isabekyan (HR), Arus Smbatyan (Finance and Accounting).
- Awards that Galaxsys attributes to Tower Rush: Sigma Europe Awards, Best New Casino Game, 2024; Sigma Africa Awards, Best Crash Game, 2025; Sigma Eurasia Awards, Best New Game, 2025; SlotsCalendar Awards, Crash Game of the Year, 2026. The corporate list also includes Maestro, Ninja Crash and studio awards. The list in the thematic information Galaxsys is below.
- Promotional tools of Galaxsys: Gift Box, Jackpot, Match Day, CrashBack, Missions, Bank, Chat, MoneyLand, Bonus Manager and Leaderboard. The studio positions them as B2B tools for engagement and retention. A specific player's participation in a promotion is determined by a separate offer card; the B2B menu itself does not activate a reward.

Tower Rush in the mobile demo Galaxsys

On one saved game screen, the balance **99 680 FUN**, **Net Position −320 FUN**, the result on the button Cashout **215,6 FUN**, and the labels **×2,8** and **×0,7** in the Results panel are visible. Two visually distinct tower

elements are already standing on the stage; the next floor is suspended from the crane. The visible results panel contains two multipliers. This is a snapshot of the state of a demo round.

States of the official demo Tower Rush

- TOWER RUSH
- Tower Rush is an exhilarating game where players aim to build an endless chain of floors, stacking them to achieve the highest possible odds.
- DEMO PLAY
- MGA/B2B/592/2018
- PLEASE GAMBLE RESPONSIBLY
- RTP
- RTP — 96.2%-97.6%
- RELEASE DATE
- February 28, 2024
- The potential number of floors is limitless, offering players a thrilling opportunity to reach new heights.
- PLAY MOBILE DEMO
- PLAY DESKTOP DEMO
- In Tower Rush, the goal is to avoid collapses and secure wins by successfully placing each floor. When players successfully place the floor, the winning odds for each new floor will be multiplied by one another, and upon cashing out, the bet amount will be multiplied by this cumulative odds value.

- Tower Rush Game Review
- Who hasn't played the fun tower building games since the dawn of computing, many of which were transferred to handheld game consoles? They are easy and exciting, allowing you to kill some hours by building cities and completing quests. Well, the innovative game developer Galaxsys decided to bring the action to the gambling realm at the end of 2024 and introduced Tower Rush.
- Tower Rush is also a Fast Game utilizing a popular Crash mechanic and offering Provably Fair round tests. If you wish to check the fairness of results, click on the Shield icon in the upper right corner of your screen. Copy the Key and Salt values and paste them in the checker below or any other online platform offering such services. If the displayed Hash Code is identical to the one on your screen, it's all fair and square.
- Galaxsys runs a variety of different game subcategories, and the common between all of them is the generous set of technical features. Plinkoman and Cash Show are good examples, and in Tower Rush, players can once again benefit from various statistics. They are displayed to the right and show the achievements of other players, too. If you haven't played tower games before, continue with the next section to find out the essentials!
- Tower Rush Slot - Game Screen
- Tower Rush features an extremely simple concept - build towers, floor by floor until you win or lose. Unlike the old-school arcades, like SkyTower or Cities: Skylines, the gambling game is endless. The number of floors is not capped, and you can continue to drop them one on top of the others until you decide to cash out or lose.
- Tower Rush has a ranging RTP between 96.12% to 97%, which is around the average for Crash casino games. Due to the game specifications, volatility can't be measured. The max win is capped at €10,000 or up

to 100x the bet if you play with the maximum stake. A Tower Rush demo is available at SlotCatalog totally for free!

- Tower Rush Features
- Crash games attract the attention of a specific group of players because of their simplicity and lack of special features. Here is where Tower Rush steps in to outstand the competition! The game is packed with 3 Bonus Games that may activate randomly on any drop. Continue with the following lines to find out how they can boost your performance!
- Frozen Floor Bonus
- Frozen Floor may randomly drop disguised as a normal floor, and it'll reveal itself if the drop is successful. This bonus feature immediately freezes the current win, and you can't lose it, even if you decide to continue playing. The Frozen Floor bonus can be awarded only once, and if you get it, no other bonuses will be awarded.
- Temple Floor Bonus
- Temple Floor is also a random bonus, which, if activated, enters players in a mini-game mode with a 10-section Bonus Wheel. It offers the following odds: x1.50, x1.50, x2, x2, x3, x3, x5, x5, x7, and Frozen Floor Bonus. The Wheel will spin automatically and award one of the rewards. You can continue playing the round after that or cash out. Players can receive multiple Temple Floor bonuses within the same round.
- Triple Build Bonus
- Triple Build is quite similar to Temple Floor, as it is a random bonus disguised as a normal floor, and it can be awarded multiple times. If dropped successfully, this bonus adds a total of 3 floors instead of 1, and each will have an odds multiplier of x1 or greater.
- Tower Rush Slot – Bonus Wheel Gameplay Screen
- Theme & Graphics
- Tower Rush draws a construction side somewhere in the residential part of the city. The base of your building is a green pavilion, while each floor has its own design and vibe. Graphics and audio are nice and fun, but nothing too lavish and exceptional, as it is a Crash game after all.
- The lack of script and in-game achievements is a pity, but again, that is the concept behind Fast Games. Tower Rush is available in desktop and mobile view for players willing to switch between devices. It's an HTML5 arcade compatible with Windows, Android, and iOS. I personally recommend Chrome after testing the title via several browsers.
- Pros And Cons Of Tower Rush Slot
- Pros
- Potentially high RTP rate of up to 97%
- Plenty of statistics and tech tools
- Cons
- Max win of just 100x the bet
- Our Verdict
- Tower Rush is another release clearly displaying the potential of Galaxsys. It is well-designed and provides robust gameplay enhanced with bonus features. However, the greatest strength is often also the greatest weakness. Players are looking for simpler features when they choose Crash games or instant-win arcades.
- Moreover, the machine is surprisingly missing more sophisticated betting features, like Autoplay or Auto Cashout. Those are among the top benefits of Tower X, which seems to be the highest-rated online game of the type. It was released in 2023 by Smartsoft Gaming and pays up to 5,000x the bet!

- The low win cap is another drawback that Tower Rush will suffer since most players understand that the limit is extremely difficult to achieve. Therefore, the overall feeling is that you should be happy with wins around 10x - 20x. Tower X feels superior because of the larger odds of each floor and the transparent differentiation of possible rewards.
- If you want to try something different, I can suggest Cash Buster Towers by Instant Win Gaming, although the concept there is different. All in all, Tower Rush is a good game if you are on a hunt for this type of gambling experience. The design brings me back to the years of the first building games but with better graphics, less complicated goals, and the chance to end the session with a few bucks on top!

- Game Limits
- Min Bet = 1 Fun
- Max Bet = 100 Fun
- Max Win = 10.000 Fun
- In case the player has reached the Maximum Win limit, the system informs with a notification that regardless of playing, the winning amount won't increase as it has reached the maximum win limit and if the player keeps playing s/he may lose the whole accumulated amount.
- To start the game, the player first needs to specify the bet amount in the designated field, then press the “Build” button. Once the button is pressed, the first floor, initially attached to a crane, is dropped from the above; in case the building floor is successfully placed, the player wins in the game round (the winning equals the bet amount multiplied by the corresponding odds). Then the player has two options: either press the “Cashout” button, receiving the win amount, or continue the game by pressing the “Build” button again.
- In case the player clicks on the “Cashout” button, the accumulated win amount will be immediately transferred to her/his balance, while the game will be displayed in the initial view again, allowing the player to start a new round.

- Simultaneously, if the player presses the “Build” button, the round will be carried on with another building floor, attached to a crane, dropped from above. If the player manages to place on each other more than one floor, the winning odds received for each new floor will be multiplied by the total winning amount already accumulated by the player.
- If the building floor collapses, the player loses in the game round, and the game is displayed in the original view, after which the player is free to start a new round. However, this does not apply to situations when the current odds are frozen due to the frozen floor in the bonus mode.
- In the game, there are three different ways to receive bonuses: with the help of the Frozen Floor, Temple Floor and Triple Build. All bonus floors are dropped as general ones, so that the player cannot distinguish them from usual building floors. As soon as a bonus floor is dropped successfully, it becomes revealed that the floor implies a certain bonus.
- In a random game round, the Frozen Floor may be dropped from the above. This bonus immediately freezes the total win amount; consequently, even in the case of eventually losing the game round, the player will still receive the frozen amount. However, it does not apply to the situations when the player decides to continue the game, receives the winning which exceeds the frozen amount and decides to cash it out. In this case, the final win amount, which is greater than the frozen one, will be transferred to the player’s balance.
- The players have a chance to randomly receive a Temple Floor bonus, which allows them to enter a game mode with the bonus wheel consisting of 10 sections. Each section has its corresponding odds: x1.5, x1.5, x2, x2, x3, x3, x5, x5 and x7. The 10th section is the freezing bonus described above.
- The wheel is spun automatically, after which it stops at certain odds that are multiplied by the current winning of the player. If the wheel stops at the freezing bonus, the player's current winning will be frozen. This bonus implies a single spin, after which the player may continue the game. It is possible to get more than one Temple Floor bonus in one game round.
- If in a random game round the Triple Build floor is dropped from the above, the player will have three additional floors placed on each other automatically. The odds of each additional floor are equal to or greater than x1. Just like with the case of Temple Floor, the player may receive several Triple Build bonuses within one round.
- RTP of the game is 96.17-97%.

22. Demo mode

ID	Attribute	Value and scope
22-01	Owner of the demo product	The official demo is Galaxsys; the operator demo is the corresponding operator; the editorial simulator is not declared an official game.
22-02	Balance currency	FUN — conventional units, not BDT.
22-03	Registration required	The official desktop/mobile entries open the demo without an operator account; restrictions of specific casinos are separated.
22-04	Deposit required	No deposit was required for the official FUN demo; the money mode has its own account.
22-05	The same settings are available	Build, Cashout, three special floors, history, and the range 1–100 FUN; operator cash limits differ.
22-06	Balance reset rule	A new independent demo session started with 100 000 FUN; the reset was not recorded as a win.
22-07	Cash withdrawal possible	External cash withdrawal FUN is absent.
22-08	Match of mathematical configuration	Demo config 90 and TR-BDT-OP-01 have their own rules and range RTP; the mathematical configuration is identified by its config.
22-09	Mobile access	ENV-A01 Chrome Android; ENV-I01 Safari; portrait and landscape orientation were considered separately.
22-10	Switching to money mode	I switched to the operator real mode, selected the money wallet, and checked the currency; 100 000 FUN were not transferred to the deposit.
22-11	ID of the demo episode	DEMO-TR-01: original Tower Rush, Galaxsys, config 90, ENV-A01, Bangladesh.
22-12	Demo balance currency	FUN; the display of a conventional amount does not mean the casino is ready to pay it out.
22-13	Initial demo balance	100 000,00 FUN.
22-14	Demo balance reset	After DEMO-TR-01, a new independent session returned 100 000 FUN; the difference from the previous balance is a reset adjustment.
22-15	Demo session total	DEMO-TR-01: 100 000−400+315=99 915 FUN; before reset net −85 FUN, reset +85 FUN separately from game 315 FUN.

GR12. Official launch page

ID	Attribute	Value and scope
GR12-02	Official launch page	https://galaxsys.co/games/demo/desktop/tower-rush/ ; отдельно https://galaxsys.co/games/demo/mobile/tower-rush/ .
GR12-03	Game frame address	The session frame is issued by the official launcher and uses token/playerId; the short-lived link is not published as a permanent editorial URL.
GR12-04	Allowed launch parameters	In the saved demo activeGameId90, culture=en, isDemo=true, mode=2; external partner13/isMobiletrue and nested partner2112/isMobilefalse are different levels.
GR12-05	Embedding method	On the editorial site, a transition to the official demo page in a separate tab is adopted; the right to arbitrary iframe embedding is not assumed from the presence of URL.
GR12-06	Route when embedding is restricted	When iframe is prohibited, I used the official separate launch; geoblocking was not bypassed, the simulator was not called a demo Galaxsys.
GR12-08	Designation of virtual mode	FUN and isDemo=true; the operator's money wallet has its own currency and a different mode.

DEMO-TR-01 — four paid towers FUN

I opened the official mobile-demo on ENV-A01 without an account and deposit. Initial balance 100 000 FUN, bet 100 FUN in each cycle. I separated the intermediate button amount from the credit after Cashout.

Round	Bet FUN	After debit FUN	Total ×	Gross FUN	After gross FUN	Chain
DEMO-TR-01-R01	100	99 900,00	2,3200	232,00	100 132,00	100×1,6×1,45, Cashout
DEMO-TR-01-R02	100	100 032,00	0,0000	0,00	100 032,00	collapse without Frozen
DEMO-TR-01-R03	100	99 932,00	0,4500	45,00	99 977,00	100×0,45, Cashout
DEMO-TR-01-R04	100	99 877,00	0,3800	38,00	99 915,00	100×0,4×0,95, Cashout

I completed 4 cycles: T400 FUN, G315 FUN, net−85 FUN, observed return 78,75%, remaining 99 915 FUN. The payout was in 3 of 4 cycles, profit — in 1 of 4. A new independent demo session showed 100 000 FUN; reset+85 FUN is separated from G315 FUN. There is no external monetary withdrawal.
