Data handling, retention and privacy requests

Published by Ariful Hosain

32. Editorial and personal data

ID	Attribute	Value and scope
32-03	Personal data contact	privacy@towerrushbanga.com — project contact for personal data requests.
32-07	Consent	Separate consent to process the request before submitting the form; marketing subscription is not attached to it.
32-09	Editorial site account	Reader accounts are not included; the editorial desk does not collect passwords or financial details.
32-10	Analytics	Third-party analytics are not included; metrics at the level of private technical logs are separated from profiling.
32-11	Cookies	Only necessary technical form/session settings; optional tracking is off.
32-12	Email copies	A copy of the request in the editorial inbox is stored separately from the form record.
32-13	Retention of requests	Form record 180 days from final closure of the request; email copy 180 days from sending the reply.
32-14	Logs	Technical log 30 days from the event; full casino payment data are not transferred to the editorial site.
32-15	Backups	Backup rotation 35 days; deletion of a working record does not mean immediate disappearance from all backups.
32-16	AI assistant	The AI chat for visitors is not enabled; reader questions are not passed to the model automatically.
32-17	AI history on the site side	There is no AI history on the site side, since the feature is disabled.
32-28	Newsletter parameters	The newsletter is disabled; the request email is not added to the subscription.
32-29	Analytics provider	No third-party analytics provider is connected; there is no separate recipient of analytical profiles.
32-30	Advertising pixels	Advertising pixels are not enabled; data are not sent to advertising networks.
32-31	Cookie categories	Necessary — enabled for the form to work; analytical/marketing — disabled; absence of consent does not block reading the review.

ID	Attribute	Value and scope
32-32	Hosting provider and location	Project hosting profile: static hosting in EU, request data separately; the external provider and contract relate to the project's hosting details.
32-33	Personal data responsible person	Ariful Hosain, privacy@towerrushbanga.com.
32-34	Data category and recipient	Form: name/pseudonym, email, text→editorial desk; casino details are not required.
32-34	Data category and recipient	Technical log: IP, user-agent, time→administrator; term 30 days from the event.
32-35	Retention period start event	Form:180 days from closure of the request.
32-35	Retention period start event	Email copy:180 days from the reply.
32-35	Retention period start event	Technical log:30 days from the event.
32-35	Retention period start event	Backup:35 days from creation of the copy.
32-36	Deletion of the working record	After a justified request, the working record is deleted within 7 days; the necessary information about fulfillment of the request is stored separately for 30 days.
32-37	Deletion from backup	A deleted record disappears from rotation backups no later than 35 days, without being restored to the working database on rollback.
32-38	AI provider, model and region	The AI provider, model and region are not involved, since the user AI service is not enabled.
32-39	Storage configuration at the AI provider	There is no transfer to or storage at the AI provider in the adopted site model.
