Operator registration steps and account requirements

Published by Ariful Hosain

GR17. Account type for access

ID	Attribute	Value and scope
GR17-06	Account type for access	For real — a single operator account with KYC; for the official FUN-demo, an operator account was not required.
GR17-07	Link between game and cash balances	In monetary OP, the cash wallet is linked to the cash desk; transfers between internal wallets are not recorded as an external deposit. Bonus and FUN are separate.
GR17-10	Historical availability period	The original snapshot 03.11.2026 and OP-dates 04–10.11.2026 have different scopes; the previous banner does not cancel the ban on new registration Betify Bangladesh.

29. Account, KYC and legal jurisdictions

ID	Attribute	Value and scope
29-11	Email confirmation	In OP-01 the email was confirmed via a link after registration; this does not mean automatic confirmation of every subsequent withdrawal.
29-20	Registration method	OP-01: email and phone; OP episodes of other operators use their own registration card.
29-21	Required registration fields	OP-01: email; password; country Bangladesh; currency BDT; phone; confirmation of age and terms — each a separate form element.
29-22	Optional registration fields	Promo code was skipped; newsletter was not enabled; these fields were not used as mandatory.
29-23	Phone confirmation during registration	The phone was entered at registration; confirmation SMS was performed at a sensitive action, and was not called a mandatory registration document.
29-24	Email confirmation during registration	The email link was accepted after account creation, before the start of the monetary route.
29-25	Documents during registration	At registration OP-01 documents were not requested; KYC of the first withdrawal was processed separately.
