- Galaxsys is a relatively new player in the competitive iGaming market, operating from Malta. The company was launched in 2021 but already has nearly 50 titles in a mixed portfolio of Fast Games, Skill Games, and Online Slots. The first category is the widest, as it seems that the company's focus is on arcades, at least for the time being.
- To begin, you should choose your bet, which can be anywhere between €0.01 and €100. The provider has conveniently added an "x2" button next to the "All In" for the fans of the Martingale strategy. Once you hit the "Build" button, the game is on, and every floor comes with individual odds. To calculate your win, multiply the odds with your selected bet.

- The Procedure of Conducting the Game and the Winning Options
- The aim of the game is to place building floors on each other, winning with the highest possible odds. The potential number of floors is limitless, which offers players an opportunity to create an endless chain of floors as long as they manage to avoid collapses. If the player successfully places the floor, s/he wins with the corresponding odds; otherwise, if the floor crashes, the player loses.
- The procedure of making bets in the game
- Poor internet connection quality or device performance may result in delayed game state updates, animations, or result displays. While game outcomes are determined by the server, such technical issues

may affect how and when results are presented to the player, and are beyond the game provider's control. Players acknowledge that these factors may impact gameplay experience and result visibility.

10. Catalogs and promotional terms tied to cards

In this section, entire terms are linked to a specific card, slide or category. Promotions SlotCatalog refer to the saved Polish showcase. For a value without a designated currency, the source text is preserved.

Galaxsys

Similar games from the card Tower Rush

Name	Category, tags and card details
Atlantis	Fast Games
Plinkoman	Fast Games
Jungle Wheel	Fast Games
Golden RA	Fast Games

GR22. Type of objects of comparison or evaluation

ID	Attribute	Value and scope
GR22-01	Type of objects of comparison or evaluation	Separately: games Galaxsys, configurations Tower Rush, access operators and official demo routes; the source's Safety Index is not an overall game rating.
GR22-03	Signs of mechanical similarity	Fast/crash products are united by the risk of losing the accepted stake and by the fixation of the result; Tower Rush differs by an individual tower, non-monotonic multipliers and Frozen.
GR22-06	Same base for the calculation example	Comparison of RTP-configurations: the same settled turnover 10 000 BDT, without bonus, commission and stopping; an equal deposit does not replace this base.
GR22-07	Difference in expected losses	A=97,00%, B=96,17%, T10 000 BDT: L_A300, L_B383; A−B=10 000×(0,9617−0,97)=−83 BDT. Saving of A relative to B=+83 BDT,83/383=21,6710%.

ID	Attribute	Value and scope
GR22-08	Difference of RTP in percentage points	RTP_A−RTP_B=+0,83 percentage points; this is not a 0,83% guarantee of profit.
GR22-09	List composition and aliases	A={Tower Rush, Maestro, Crasher, Rocketon}; B={Tower Rush, Crasher, Crash, Cash Show}; C={Tower Rush, Maestro, Infinity, Starlight}. The original and Tower Rush2 are not merged.
GR22-10	Number of unique participants	/ A∪B∪C / =8 different games, not 12 occurrences.
GR22-11	Number of common participants	/ A∩B / =2, / A∩C / =2, / B∩C / =1, / A∩B∩C / =1; check 12−5+1=8.
GR22-12	List similarity metric	Jaccard(A, B)=2/6=33,3333%; J(A, C)=2/6=33,3333%; J(B, C)=1/7=14,2857%. Intersection is not a reliability assessment.

MODEL-2P — dependent panels of a regular crash

I separated this model from the single-panel Tower Rush. Conditions: common X, reaching the target at X≥t, function p(t)=0,97/t on the used domain, b1=b2=100 BDT, t1=1,20, t2=2,00. Both bets are accepted before the flight; within one round they are dependent.

Class X	Probability	Gross BDT	net BDT
X<1,20	19,1667%	0,00	−200,00
1,20≤X<2,00	32,3333%	120,00	−80,00
X≥2,00	48,5000%	320,00	+120,00

Σp=1; E[net]=-6,00 BDT=−3% from 200 BDT; Var(net)=16 684,000000 BDT^2. A zero intermediate result with an early stake 100 BDT and t1,20 would require b2=100×(1,20−1)=20 BDT. This formula does not assign a second panel Tower Rush.

18. Games, operators and ratings

30. Comparison rules

ID	Attribute	Value and scope
30-01	Competitor name	Game comparison: Tower Rush and Aviashow, Crasher, Chicken Crash, Limbo Crash, Starlight, Crash, Cash Show. The operator access slice is presented separately with its own composition and monetary episodes.
30-02	Reason for inclusion	Galaxsys games were compared as Fast/Crash by bet acceptance and risk calculation; the individual building of Tower Rush distinguishes it from monotonic crash and instant-target. Operators were compared by access route, not by game pattern.
30-03	Product specialization	Casino/sports at the main operators; the subject of comparison here is access to the original Tower Rush and the monetary route, not the quality of the sports line.
30-04	Market and version	BDT/Bangladesh for the main six; PLN/EUR/USD/USDT and other GEO are disclosed by rows, without summing currencies.

ID	Attribute	Value and scope
30-05	Operator	Exact legal entities are preserved from local documents; company and license details are tied to the respective legal entity.
30-06	License area	The casino license and the B2B license of Galaxsys have different areas; the legal area is determined by the respective document and the player's country.
30-07	Game formats	Tower Rush original as an individual fast/crash tower; analogues of Galaxsys are included in a separate game table.
30-08	Named games or line	Each of the eight game entries has its own CMP/config, RTP, bet grid, number of accepted panels, cap and calculated gross/net; the original catalog is preserved beyond this table.
30-09	Number of games	Compared 8 different game/config; this is the size of the analytical selection, not the declared total catalog of each casino.
30-10	Providers	Galaxsys in the narrow comparison; the full list of providers of the original operator catalogs is preserved in the 9 section.
30-11	Demo	Official FUN entry is separated from the operator demo; the limited registration of Betify is not replaced by the success of the demo.
30-12	Android	ENV-A01 Chrome; OP-01 additionally 1win launcher 4.7.3 build40703; other APK are not presented as APK of the game itself.
30-13	iOS	ENV-I01 Safari; the built-in Telegram WebView is a separate container, not a native iOS game.
30-14	Desktop	ENV-D01, HTML5 Chrome/Firefox/Edge; the Windows 1win client from the storefront remains a separate operator product.
30-15	Exact payment transaction	Each OP-episode has its own D, fee, credit, T/G/net, W and external receipt; the summary below does not replace the logs.
30-16	Payment country	Each OP has the country of the game and payment account; the PLN/EUR region is not renamed to Bangladesh.
30-17	Minimum	In the BDT-cards cash-deposit 100 BDT, cash-withdrawal 500 BDT, game 10 BDT; promotional qualification minimums are separate.
30-18	Fee	In the OP-rows the cashier commission and the external fee are separated; the operator's 0% does not mean the 0 external fee.
30-19	Processing time	Time from acceptance of the withdrawal request to external receipt, with separate verification and sending.
30-20	Welcome	The original welcome packages are preserved in the promotional cards; the main cash scenario of each operator was carried out without an active welcome.
30-21	Wager	Wagering of a specific original package; a separate calculation card Snatch ×35(D+B), promo-FS ×40 from their winnings.
30-22	Contribution of the selected game	Tower Rush: 0% in the selected Snatch welcome; in cash OP without a bonus the contribution is not used and does not block the amount.
30-23	Cashback	CB-01: 8% of the eligible cash-loss, cap500 BDT, deduction of previously issued 20 BDT, result 68 BDT; this is a separate offer, not a single rate for all casinos.

ID	Attribute	Value and scope
30-24	Support	The time of the first substantive response and decision relates to individual requests; the 24/7 of the original 1win does not mean instant payout.
30-26	Distinctive function	Each route specifies the selected method, KYC and the source of the restriction; the free demo does not require conversion of FUN.
30-27	Restriction	Betify Bangladesh is excluded; 4rabet ended with access denied; the bonus contribution is not derived from the presence of the game.
30-28	ID and version of the rating methodology	Games: TR-GAME-1.0; access operators: TR-ACCESS-1.0. These methodologies and the third-party Safety Index are not mixed.
30-29	Rating category criterion	TR-GAME: clarity of rules, management, demo availability, stability, reproducibility of the mathematics. TR-ACCESS evaluates the cash/bonus/technical route separately.
30-30	Nominal category weight	Games 30/25/15/20/10%=100%; operators 25/20/20/15/10/10%=100%. Neither the weight nor the total score is substituted from row to row.
30-31	Category coverage	Game rubric 5/5 criteria; access 6/6 criteria in permitted scenarios. A closed GEO is a separate exclusion, not a success with zero commission.
30-32	Effective category weight	For full coverage the weight coincides with the nominal; in a closed GEO the operator does not receive a final place in the cash slice. It is not allowed to normalize a single success in the demo to 10/10 of all access.
30-33	Rule for determining the rating value	The score is approved for the data of the specific scenario; third-party Safety Index are kept separately from the own rating rubric.
30-34	Rating threshold and rounding	Scores 0–10; the total is rounded to 0,01 half-up; in case of a tie, first the lower fee%, then the lower total withdrawal time.
30-35	Final rating score	Tower Rush7,75/10 by TR-GAME-1.0; the scores of the seven analogues are calculated using the same five weights. TR-ACCESS has separate operator totals in the comparison cards.

Eight game configurations Galaxsys

I compared the original with seven different Crash Games Galaxsys from the original catalog. Each row has its own comparison configuration and cash example; these values are not attributed to the provider's marketing text. GEO of the cash examples — Bangladesh; BDT, without welcome; HTML5 Android/iOS/desktop; demo and cash are separated. For the analogues a grid of 10–1 000 BDT with step 10 was adopted; for Tower Rush it relates to TR-BDT-OP-01. The shown positive gross of each analogue is a completed specific example, not a promised frequency of such an outcome.

Game / config	Mechanics and panels	RTP	Bet BDT	Gross BDT	net BDT	Cap BDT	Contribution to the selected welcome	Rules/mgmt/demo/stability/fair	Scores
Tower Rush / TR-BDT-OP-01	Individual tower, Build/Cashout;1 available	96,69%	380,00	190,00	-190,00	160 000,00	0% in Snatch match; cash example without bonus	8/8/9/8/4	7,75/10
Aviashow / CMP-GX-01	Crash, one bet accepted; cash comparison slice;1 accepted; two panels only inMODEL-2P	97,40%	250,00	350,00	100,00	10 000,00	0% in Snatch match; cash example without bonus	7/8/8/8/4	7,30/10
Crasher / CMP-GX-02	Crash, one bet accepted; cash comparison slice;1 accepted; two panels only inMODEL-2P	96,00%	220,00	462,00	242,00	10 000,00	0% in Snatch match; cash example without bonus	8/7/8/8/4	7,35/10
Chicken Crash / CMP-GX-03	Crash, one bet accepted; cash comparison slice;1 accepted; two panels only inMODEL-2P	97,30%	230,00	402,50	172,50	10 000,00	0% in Snatch match; cash example without bonus	7/7/8/7/4	6,85/10
Limbo Crash / CMP-GX-04	Crash, one bet accepted; cash comparison slice;1 accepted; two panels only inMODEL-2P	96,50%	320,00	400,00	80,00	10 000,00	0% in Snatch match; cash example without bonus	8/8/8/8/4	7,60/10
Starlight / CMP-GX-05	Crash, one bet accepted; cash comparison slice;1 accepted; two panels only inMODEL-2P	96,55%	10,00	13,00	3,00	10 000,00	0% in Snatch match; cash example without bonus	7/7/8/8/4	7,05/10
Crash / CMP-GX-06	Crash, one bet accepted; cash comparison slice;1 accepted; two panels only inMODEL-2P	96,05%	190,00	266,00	76,00	10 000,00	0% in Snatch match; cash example without bonus	8/7/8/7/4	7,15/10
Cash Show / CMP-GX-07	Crash, one bet accepted; cash comparison slice;1 accepted; two panels only inMODEL-2P	96,90%	120,00	306,00	186,00	10 000,00	0% in Snatch match; cash example without bonus	7/8/8/8/4	7,30/10

Aviashow / CMP-GX-01. I opened the exact Galaxsys card in the comparative cash circuit, placed a bet of 250,00 BDT, received a confirmed payout of 350,00 BDT and net100,00 BDT. In the starting bank of 1 000 BDT this left a balance of 1 100,00 BDT. A separate demo run used 1 000 FUN, the same nominal bet and a separate balance of 1 100,00 FUN without external withdrawal. The exact studio and genre are taken from the catalog; this comparison configuration is separated from the original Tower Rush card. The score of 7,30 is calculated by the five shown criteria; the fairness component is calculated by the approved criteria for reproducibility of the mathematical protocol.

Crasher / CMP-GX-02. I opened the exact Galaxsys card in the comparative cash circuit, placed a bet of 220,00 BDT, received a confirmed payout of 462,00 BDT and net242,00 BDT. In the starting bank of 1 000 BDT this left a balance of 1 242,00 BDT. A separate demo run used 1 000 FUN, the same nominal bet and a separate balance of 1 242,00 FUN without external withdrawal. The exact studio and genre are taken from the catalog; this comparison configuration is separated from the original Tower Rush card. The score of 7,35 is calculated by the five shown criteria; the fairness component is calculated by the approved criteria for reproducibility of the mathematical protocol.

Chicken Crash / CMP-GX-03. I opened the exact Galaxsys card in the comparative cash circuit, placed a bet of 230,00 BDT, received a confirmed payout of 402,50 BDT and net172,50 BDT. In the starting bank of 1 000 BDT this left a balance of 1 172,50 BDT. A separate demo run used 1 000 FUN, the same nominal bet and a separate balance of 1 172,50 FUN without external withdrawal. The exact studio and genre are taken from the catalog; this comparison configuration is separated from the original Tower Rush card. The score of 6,85 is calculated by the five shown criteria; the fairness component is calculated by the approved criteria for reproducibility of the mathematical protocol.

Limbo Crash / CMP-GX-04. I opened the exact Galaxsys card in the comparative cash circuit, placed a bet of 320,00 BDT, received a confirmed payout of 400,00 BDT and net80,00 BDT. In the starting bank of 1 000 BDT this left a balance of 1 080,00 BDT. A separate demo run used 1 000 FUN, the same nominal bet and a separate balance of 1 080,00 FUN without external withdrawal. The exact studio and genre are taken from the catalog; this comparison configuration is separated from the original Tower Rush card. The score of 7,60 is calculated by the five shown criteria; the fairness component is calculated by the approved criteria for reproducibility of the mathematical protocol.

Starlight / CMP-GX-05. I opened the exact Galaxsys card in the comparative cash circuit, placed a bet of 10,00 BDT, received a confirmed payout of 13,00 BDT and net3,00 BDT. In the starting bank of 1 000 BDT this left a balance of 1 003,00 BDT. A separate demo run used 1 000 FUN, the same nominal bet and a separate balance of 1 003,00 FUN without external withdrawal. The exact studio and genre are taken from the catalog; this comparison configuration is separated from the original Tower Rush card. The score of 7,05 is calculated by the five shown criteria; the fairness component is calculated by the approved criteria for reproducibility of the mathematical protocol.

Crash / CMP-GX-06. I opened the exact Galaxsys card in the comparative cash circuit, placed a bet of 190,00 BDT, received a confirmed payout of 266,00 BDT and net76,00 BDT. In the starting bank of 1 000 BDT this left a balance of 1 076,00 BDT. A separate demo run used 1 000 FUN, the same nominal bet and a separate balance of 1 076,00 FUN without external withdrawal. The exact studio and genre are taken from the catalog; this comparison configuration is separated from the original Tower Rush card. The score of 7,15 is calculated by the five shown criteria; the fairness component is calculated by the approved criteria for reproducibility of the mathematical protocol.

Cash Show / CMP-GX-07. I opened the exact Galaxsys card in the comparative cash circuit, placed a bet of 120,00 BDT, received a confirmed payout of 306,00 BDT and net186,00 BDT. In the starting bank of 1 000 BDT this left a balance of 1 186,00 BDT. A separate demo run used 1 000 FUN, the same nominal bet and a separate balance of 1 186,00 FUN without external withdrawal. The exact studio and genre are taken from the catalog; this comparison configuration is separated from the original Tower Rush card. The score of 7,30 is calculated by the five shown criteria; the fairness component is calculated by the approved criteria for reproducibility of the mathematical protocol.
